PART B - VERIFICATION OF THE VEHICLE IDENTIFICATION NUMBER

This section requires a physical inspection under the windshield and in the door jamb to verify the vehicle identification number (VIN) for the motor vehicle described in this form. If the motor vehicle was manufactured prior to 1955, the motor number must be verified. If the verification is performed by someone other than a Notary, the VIN verification can be performed by a Florida Licensed Dealer, Law Enforcement Officer, Military Police Officer, or Florida Compliance Examiner/Inspector (Division of Motorist Services/Tax Collector employee). Complete this section on all used motor vehicles, including trailers, (with abbreviation of "TL" with a weight of 2,000 pounds or more) not currently titled in Florida.

I, the undersigned, certify that I have physically inspected the above described vehicle and find the vehicle identification number under the windshield and in the door jamb to be identical to the vehicle identification number recorded on this form.

UNDER PENALTY OF PERJURY, I DECLARE THAT I HAVE READ THE FOREGOING DOCUMENT AND THAT THE FACTS STATED IN IT ARE TRUE.

How to fill out HSMV 82042 — Vehicle Identification Number and Odometer Verification

Florida · written against HSMV 82042 (Rev 01/15/21), issued under section 319.23(3)(a), Florida Statutes

Florida's proof that the car in the driveway is the car on the paperwork. It is required on every used motor vehicle not currently titled in Florida, including trailers of 2,000 pounds or more, and it is two affidavits stapled together: yours about the vehicle and the mileage, and a second one from somebody authorised to say they physically looked at the number.

This sheet is not the form. Download the blank HSMV 82042 from the Florida Department of Highway Safety and Motor Vehicles at <https://www.flhsmv.gov/pdf/forms/82042.pdf> — always take the current revision from the agency rather than a copy. Print this and keep it beside you while you complete theirs.

Every line, in the order you meet it

1	YOU	The date on the affidavit	Top right of Part A, before anything else. Watch out: The paragraph beneath it certifies that on the date entered above you made a physical inspection of the vehicle. Dating it for a day you were not standing next to the car is the part of this form that is an affidavit rather than a checklist.
2	YOU	Vehicle identification	VIN, year, make, colour and body type across the strip. Watch out: The heading beside it carries a footnote most people never read: motor number for all makes through 1954, identification number 1955 and later. If you are titling something genuinely old, that is the difference between two numbers in two different places.
3	YOU	Previous state the vehicle was titled in	The state the certificate you are surrendering came from. Watch out: It is also the answer to why you are filling this in at all. Part B has to be completed on all used motor vehicles not currently titled in Florida, so a car that has always been Florida-titled does not need this form.
4	YOU	The odometer declaration	Tick 5 or 6 digit, one figure per box, the date read, then one of the three statements. Watch out: Reading the dash is part of the physical inspection you are swearing to. It is the same reading that will go on the title application, and a discrepancy between the two is a discrepancy in one document, because both of them are yours.
5	YOU	The two signature lines under Part A	Owner or purchaser signature and printed name on the left, seller's signature and printed name on the right. Watch out: The seller here is whoever you got the vehicle from, and their half is frequently blank because they are in another state. Get it if you can: an unsigned seller line is one more thing for a clerk to ask about.
6	DEALER	Part B, and who is allowed to complete it	A date, the commissioned name of a Florida notary and their signature - or, instead of a notary, one of the four ticked rows underneath with a name, badge or dealer number. Watch out: This is the one place a notary genuinely appears in Florida vehicle paperwork, and it is not the sale. They are certifying they physically inspected the number under the windscreen and in the door jamb, which is why the vehicle has to be with them.

What gets this one rejected

- An alteration. The notice across the foot reads that any alteration or erasure may void this document.
- One inspection instead of two places. The certification names both the windshield and the door jamb, and it is a statement that the numbers match in both.
- Verification by a friend, a mechanic or a garage. The list of people who may sign Part B is closed, and none of those are on it.
- Skipping Part A because a notary did Part B. The owner's own affidavit and odometer declaration are a separate signature and a separate perjury declaration.
- Using it on a vehicle that is already titled in Florida, where nothing here is required at all.
