## Georgia Department of Revenue - Motor Vehicle Division Odometer Discrepancy Affidavit

ANY CORRECTION OR ALTERATION WILL VOID THIS FORM

**Purpose of this affidavit:** This affidavit is to be used by a seller/transferor and purchaser/transferee to execute statements of facts when there is an odometer discrepancy reflected on documents pertaining to the transfer of ownership of a vehicle.

This is to certify that:

- I, the seller/transferor, sold or transferred the ownership of the vehicle described above to the named purchaser/transferee.
- To the best of my knowledge at the time that I sold or transferred the ownership of this vehicle, the odometer reading recorded above was the total actual mileage the vehicle has traveled unless otherwise indicated. In error, the documents pertaining to the transfer of ownership of this vehicle reflects an incorrect odometer reading due to the following reason(s): A reason for discrepancy must be given or this form will not be accepted.  
Digits transposed in error on the title assignment: 181,642 written for 118,642.

# How to fill out T-107 — Odometer Discrepancy Affidavit

Georgia · written against T-107 (Rev 7-2020), issued under the Motor Vehicle Division, which the purchaser's half of this affidavit indemnifies

[/forms/georgia/t-107-odometer-discrepancy-affidavit/](https://forms.georgia.gov/forms/georgia/t-107-odometer-discrepancy-affidavit/)

The fix for a mileage figure that came out wrong on the transfer documents. It is two affidavits on one sheet - one sworn by the seller and one by the buyer - and both halves have to be completed and separately notarised before a county tag office will look at it.

**This sheet is not the form.** Download the blank T-107 from the Georgia Department of Revenue, Motor Vehicle Division at <https://dor.georgia.gov/document/form/form-t-107-odometer-discrepancy-affidavit/download?f=T-107.pdf> — always take the current revision from the agency rather than a copy. |---|-------|------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | YOU   | <b>Section A, the vehicle</b>                        | Vehicle identification number, year, make and model, at the head of the seller's half. <b>Watch out:</b> The same VIN appears again at the head of section B. They have to match, and a transposition here is the same error the affidavit is trying to cure.                                     |
| 2 | YOU   | <b>Section A, date sold and odometer reading</b>     | The date the vehicle was sold or transferred, and the true reading, in whole miles. <b>Watch out:</b> This is the correct figure, not the wrong one. The wrong figure is on the document being fixed; this affidavit says what it should have been.                                               |
| 3 | YOU   | <b>Section A, the two tick boxes</b>                 | Exceed mechanical limits of the vehicle's odometer, or not the actual mileage, warning odometer discrepancy. <b>Watch out:</b> Leave both empty where the reading is true and only the paperwork was wrong. Ticking not the actual mileage brands the vehicle for the rest of its life.           |
| 4 | YOU   | <b>Section A, the reason</b>                         | One wide rule, and the form will not be accepted without it. <b>Watch out:</b> Be specific and be short. What the document says, what it should say, and how the difference arose - that is all a tag office is looking for.                                                                      |
| 5 | YOU   | <b>Section A, the seller's notary block</b>          | Day, month and year, the notary's full legal name, physical address, e-mail address, telephone number, signature, seal and commission expiry. <b>Watch out:</b> The seller's half is sworn on its own. The buyer's notary in section B does not cover it, even if both are done in the same room. |
| 6 | BUYER | <b>Section B, the vehicle again</b>                  | Vehicle identification number, year, make and model, repeated at the head of the buyer's half. <b>Watch out:</b> The buyer completes their own half from scratch. A photocopy of the seller's half with a different signature on it is not two affidavits.                                        |
| 7 | BUYER | <b>Section B, date acquired and odometer reading</b> | The date the buyer acquired the vehicle and the reading they were given. <b>Watch out:</b> The buyer's date is the date acquired, which should be the same day as the seller's date sold. If the two differ, that is a second discrepancy on the same sheet.                                      |
| 8 | BUYER | <b>Section B, the buyer's notary block</b>           | A second, separate acknowledgement with the same details as the seller's. <b>Watch out:</b> Above it sits the indemnity: the buyer agrees to indemnify the Department for any loss due to facts contrary to the affidavit. That is what they are swearing to, not just the number.                |

### What gets this one rejected

- A missing reason. The form says it on its own face: a reason for discrepancy must be given or this form will not be accepted.
- One half completed. Section A is completed by the seller and section B by the purchaser, and each is separately sworn.
- A power of attorney signing it. The important information block says persons appointed by power of attorney cannot complete this affidavit.
- One affidavit where the error goes back further. Affidavits should be obtained from all owners since the discrepancy in the odometer reading occurred.
- Any correction or alteration. The banner across the top voids the form for either.
- Filing it alone before a title has been applied for. Where the title has not been applied for yet, it goes in with a completed and signed title application, supporting documents and the applicable title fees.
