How to fill out TC 96-215 — Affidavit of Motor Vehicle Assembled from Wrecked or Salvaged Motor Vehicles

Two pages, and the second one is worth more than the first. Page one is a short affidavit swearing where the parts came from and that the finished vehicle is yours and clear of all liens. Page two is the Cabinet's own checklist of everything that has to travel with it - a properly assigned salvage title, a labour statement, a notarised application, a certified inspector's inspection, original receipts, and a photograph or pencil tracing of a motorcycle's numbers. A rebuilt application that arrives without page two's list is an application that comes back.

This sheet is not the form. Download the blank TC 96-215 from the Kentucky Transportation Cabinet, Division of Motor Vehicle Licensing at <https://transportation.ky.gov/Organizational-Resources/Forms/TC%2096-215.pdf> — always take the current revision from the agency rather than a copy. Print this and keep it beside you while you complete theirs.

Every line, in the order you meet it

1	YOU	Section 1, who is applying	Dealer or individual name, email and full address, with the county sworn in named on the rule above. Watch out: The note beside this block is for dealerships only - it says their rebuilt title arrives already assigned to them. An individual's does not.
2	YOU	Section 2, every parts seller by name	One row per seller: who they were, and what you bought. Watch out: If any of the parts were salvaged, the footnote wants a separate attached list naming each part and the identification number of the vehicle it came off.
3	YOU	Section 3, the vehicle you have built	Vehicle identification number, make, model number, body style and model year. Watch out: This is the identification number of the vehicle being rebuilt, which is the one on the salvage title - not the number of any donor car.
4	YOU	Sign it, with your capacity beside it	Affiant signature, a title, and a date. Watch out: An individual writes Owner in the title box. The sworn sentence above it says sole owner and clear of all liens, and both halves of that are checkable.
5	YOU	Have it notarised, then read page two before you post it	The notary block, then the numbered list of everything that has to go with the affidavit. Watch out: Page two is the actual test. Assemble the whole envelope against that list before anything is sent, because a missing receipt costs another cycle.

What gets this one rejected

- Parts bought from a person with no written statement behind them. Page two wants the seller's name, address and telephone number, the parts sold and the identification number of the vehicle they came from.
- Photocopied ownership documents. The Cabinet's rebuilt page says it will not accept copies of the salvage title or of the application.
- No certified inspector. The inspection is required by statute and it is a named line on page two.
- A vehicle that was not badly damaged, with nothing to explain it. Where the vehicle is not 75 percent or more damaged, page two asks for a statement from the insurance company on its letterhead describing the extent of the damage.
- Receipts that cover several vehicles with nothing marked. Page two asks the applicant to indicate which parts on the receipt were used on this vehicle.
- Letting the approval lapse. It is valid for 60 days, and after that the application is cancelled and the whole thing starts again.
