Minnesota · written against PS2511 (5/2026), issued under Minnesota Statutes 168.32

The form that gets money back out of a Minnesota vehicle record, and one line on it is written for exactly the person reading this: registration in error, paid tax after vehicle sold to. Because the plate and the paid registration go with the car in Minnesota, a seller who renewed a fortnight before the handover has paid for a year on somebody else's vehicle - and Part B is where that comes back.

This sheet is not the form. Download the blank PS2511 from the Minnesota Driver and Vehicle Services at <https://dps.mn.gov/divisions/dvs> — always take the current revision from the agency rather than a copy. Print this and keep it beside you while you complete theirs.

Every line, in the order you meet it

1	YOU	Part A, name and address	Your name and address at the head of the form. Watch out: This is the registered owner as the record has them, which on a car you have just sold is still you.
2	YOU	Plate, sticker number, year and identification number	The row beneath: registration plate number, registration sticker number, year and vehicle identification number. Watch out: The sticker number is on the tab itself. If the tab has already gone onto the sold car, this is the point at which the claim stops being simple.
3	YOU	Refund check made payable to	Who the cheque should be written to and where it should be posted. Watch out: Usually the same as Part A. It exists because a leasing company, an estate or a business may be the party actually owed the money.
4	YOU	Tick registration in error	The third of the five grounds in Part B: registration in error, paid tax after vehicle sold to. Watch out: This is the seller's line on the form. The other four are about a duplicate registration, a destroyed vehicle, a reclassification and returned stickers.
5	YOU	The buyer's details and the date sold	Name, street address, city, state, zip code and the date of sale, on the lines under that tick. Watch out: Take them off your own Notice of Sale stub. That is what the stub is for, and it is the only place you will have written the buyer's address down.
6	YOU	Return the stickers	Not a box - the instruction at the head of Part B. The return of registration stickers is required with this form. Watch out: In Minnesota those stickers are on a plate that is staying on the car, so this is a decision to make before the handover and not a week afterwards.
7	YOU	Sign and date Part A	The signature and date under the affirmation that all statements in this application are true and correct and in accordance with provisions of law. Watch out: No notary and no witness. Like most of the Minnesota set, it stands on the signature and the sentence above it.

What gets this one rejected

- A claim with no stickers. The return of registration stickers is required with this form, and on a sold vehicle the stickers are on the plate that went with the car.
- A destroyed-vehicle claim with no title. The note under those four ticks is that current plates, stickers and title must accompany the claim or no refund is due.
- A credit for tax paid to another state with nothing to prove it. The form asks for proof of payment such as a validated receipt.
- Ticking two grounds. Each has its own boxes and its own evidence, and a form claiming a refund two ways is a form nobody can process.
- A blank date of sale on the registration-in-error line. That date is what the apportionment is worked out from.
- Assuming a refund is automatic on a sale. It is not - Minnesota's default is that the registration tax you paid is assigned to the buyer, and this form is the exception rather than the rule.
