Montana authorises remote online notarisation on any document requiring notarisation except a title. This form is the workaround the division built for that gap: it takes the place of the interest release section of the title, so an owner who cannot appear in person signs here in front of a remote notary instead of on the certificate. It is the most useful page in the whole library for a different reason too - its body is the certificate's own release sentence, reprinted, which is as close as the division comes to publishing what a Montana title actually says. Since October 2025 an ordinary sale needs no notary at all, so this now belongs to the narrow cases where one is still wanted or where an out-of-state party expects one.

This sheet is not the form. Download the blank MV24T from the Montana Department of Justice, Motor Vehicle Division, Vehicle Services Bureau at <https://mvdmt.gov/wp-content/uploads/2023/10/MV24T-Remote-Online-Notarization-Transfer-Form-0423-Fillable.pdf> — always take the current revision from the agency rather than a copy. Print this and keep it beside you while you complete theirs.

Every line, in the order you meet it

1	YOU	The sum received	The consideration, in the release sentence that transfers your right, title and interest. Watch out: This figure should match the MV24 and the buyer's application. Three documents in one envelope disagreeing about the price is the sort of thing a counter stops on.
2	YOU	The purchaser	Name, identification number and address of the person taking the vehicle. Watch out: The same person has to appear as the buyer on the title. The manual's rule that the person who signs must be the buyer written on the title applies to this form's chain as well.
3	YOU	The vehicle, by Montana title number	MT title number, year, make and the VIN or hull number. Watch out: The title number matters more here than anywhere else, because this sheet is being read alongside the certificate it partly replaces.
4	BUYER	The purchaser signs and acknowledges the mileage	Signature, printed name and date, above the line acknowledging the seller's odometer certification. Watch out: There is no mileage on this form. What the buyer is acknowledging is the certification made on the title or on the MV90A, so make sure one of those actually exists.
5	YOU	Every owner signs - remotely, before the notary	Signature, printed name, identification number and date for the seller and any co-seller. Watch out: The notary block is completed by the notary during the session, and only if you signed in their presence with your printed name listed. A form signed first and notarised afterwards is not a remote notarisation.

What gets this one rejected

- Used without the title. The form's own header requires the Montana title to accompany the application for title; this stands in for one section of it, not for the document.
- Used for an in-person notarisation. The manual: this form can only be used for Remote Online Notary.
- A mileage figure written in. There is no odometer block - the instruction sends a 2011-or-newer vehicle to an MV90A, and writing a reading in the margin is an alteration.
- One owner's signature where the title carries two. The block says all owners must sign, and the manual's per-signature notary rule bites hardest here.
- A notary completing the block without the signer present on the call. The form's own instruction: do not notarize or verify unless signed in your presence and printed name of applicant is listed.

☐ Amber is what you write ☐ Grey is a block somebody else completes The completed example follows overleaf.
