☐ I have not changed any of the major parts of this vehicle.

☐ I have changed the major parts listed above. Attach a bill of sale for each part listed. **See below for definition.**

Definition: "Bill of Sale" means a document describing a vehicle or the major part of a vehicle, including the year and make of the vehicle or the name of the major part, the identification number of the vehicle or the vehicle from which the major part was obtained, date of acquisition, the signature of the person selling or disposing of the vehicle or major part, the name of the person acquiring the vehicle or major part, and the monetary equivalent of the vehicle or major part.

How to fill out MV2673 — Major Parts Statement (Repaired Salvage Vehicle or Homemade)

sellmycarhub.com

/forms/wisconsin/mv2673-major-parts-statement/

Wisconsin · written against MV2673 (9/2024), issued under s. 342.07, Wis. Stats., and Trans Rule 149

A table of twenty-three major parts, each with a row asking where it came from, submitted to a Wisconsin salvage vehicle inspector when a repaired salvage car is put back on the road. It is the document behind a rebuilt salvage title, and if you are selling a car you repaired yourself, it is the paperwork that decided what your title says.

This sheet is not the form. Download the blank MV2673 from the Wisconsin Department of Transportation, Division of Motor Vehicles at <https://wisconsin.gov/Documents/formdocs/mv2673.pdf> — always take the current revision from the agency rather than a copy. Print this and keep it beside you while you complete theirs.

Every line, in the order you meet it

1	YOU	Owner Legal Name	The person who repaired or assembled the vehicle, at the top left. Watch out: If a dealer did the work, their number and name go in the boxes on the row below and this one still names the owner.
2	YOU	Vehicle Year, Make and Model	Three boxes across the top row, beside the owner's name. Watch out: Describe the vehicle as it was titled before the damage, not as it looks now. The salvage title number below ties the two together.
3	YOU	Vehicle Identification Number	One wide box under the header block, for the vehicle being repaired. Watch out: This is the surviving VIN, not a donor's. Donor numbers all belong in the last column of the table.
4	YOU	Wisconsin Salvage Title Number	The salvage certificate the vehicle is being brought back from. Watch out: Without it there is nothing for the inspector to match the statement against, and the application will not proceed.
5	YOU	Vehicle for Resale - YES or NO	Two ticks that tell the inspector whether the repaired car is going straight back on the market. Watch out: Answer it honestly. A resale answer that does not match what happens next is the sort of inconsistency salvage inspectors are trained on.
6	YOU	The major parts table	Twenty-three rows. For each part replaced: year, make, part number, and the identification number of the vehicle the part came from. Watch out: Leave rows blank where nothing was replaced. The empty rows are information too, and filling them with dashes reads as a form completed without thought.
7	YOU	The two statements below the table	Either no major parts were changed, or the listed parts were - and the second requires a bill of sale for each one. Watch out: The form defines what a bill of sale means here, and it includes the year and make of the vehicle the part came off. A receipt with a part number on it is not enough.
8	YOU	Signature and date	Signed by the owner or authorised agent, with the vehicle described again above the second signature block. Watch out: It is submitted with the repaired salvage vehicle application to the Wisconsin Salvage Vehicle Inspector, not posted to Madison.

- What gets this one rejected**
- A part listed with no bill of sale attached. The form requires one for each part listed and defines what a bill of sale has to contain.
 - A blank donor VIN. The last column of the table asks for the VIN of the vehicle from which the part was obtained, and it is the whole point of the table.
 - Neither of the two statements ticked. The form has to say either that nothing was changed or that the listed parts were.
 - Sending it to Madison. It goes with the repaired salvage vehicle application to the Wisconsin Salvage Vehicle Inspector, which the form says at the foot.
 - Guessing at a part number. Major parts are defined by s. 943.23(1)(b), and the definition includes any part not listed which has a value exceeding \$500.

☒ Amber is what you write ☐ Grey is a block somebody else completes The filled-in example is at the start of this sheet.
